

KX Technology: Learning & Professional Development Policy

Document ID: KX-HR-2026-004

Effective Date: June 1, 2026

1. Upskilling Budget

Every full-time employee is allocated a training budget of 25,000 THB per fiscal year.

The fiscal year runs from 1 April to 31 March; unused budget does not carry over into the next fiscal year.

2. Approved Spend

The budget can be spent on online courses, technical books, certificates, and seminars.

All learning materials must be directly relevant to the employee's current job role.

Domestic conference tickets and their associated travel are eligible when the content aligns with the employee's development plan.

3. Approval Channel

Employees must request budget pre-approval via the KX-Learning form on the company intranet.

Pre-approval must be obtained before any purchase is made; retrospective claims for unapproved spend will be declined.

Requests above 10,000 THB for a single item additionally require sign-off from the department head.

4. Certifications and Service Commitment

KX reimburses the examination fee for a professional certification once the employee has passed and submitted the official result.

For any single sponsored programme exceeding 20,000 THB, the employee agrees to a 12-month service commitment from the completion date.

If the employee resigns within that period, a pro-rata portion of the sponsored amount may be recovered from the final settlement.

5. Reimbursement Process

After completing an approved activity, employees submit the receipt and proof of completion through the KX-Learning form.

Reimbursements are processed through payroll within 15 business days of verification.
